GV App
Work. **Smarter.**

Introducing GV App

SMARTER MANAGEMENT OF HEALTHCARE CONSUMABLES

GV App is currently used in over 3,000 locations across the NHS and Healthcare in the UK. The GV App drives improvement in 4 key ways:

Reduce Spend
With measurable insights from the GV App, organisations have been able to achieve 20% reduction in usage of materials. The GV App can also establish baselines to help create further cost saving initiatives.

Sustainability Goals
From reducing overuse of clinical bags to optimising linen provision, GV App data reports help to identify where to implement changes to help reduce unnecessary consumption of materials.

Time Savings
Store personnel can effortlessly record and track the receipt, distribution, and usage of materials, eliminating manual processes and reducing administrative burden.
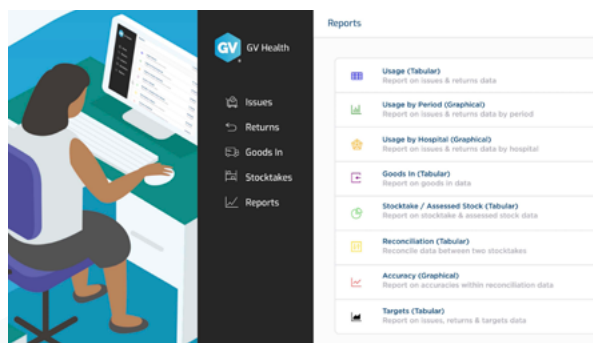

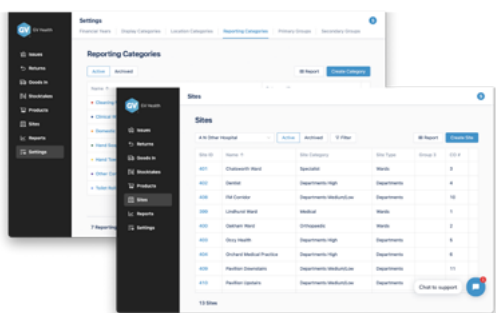

Reduce Wastage
The GV App reporting system allows for users to set benchmarks and targets for usage, helping to bring down waste of resources and encourage thoughtful usage.

Via PC or Tablet, cloud-based recording & reporting provides fast access to your data across multiple locations

Fast and easy setup with just an internet connection

A fraction of the cost compared to other systems

System updates

LARGE SITE PLAN
£209 per month
£2,500 Billed Annually

Unlimited user seats
Unlimited locations
Full reports
On-site implentation
Support via call/chat
System updates

*Bespoke setups quoted seperately

GV App FAQs

What is GV App?

The GV App is a user-friendly system that simplifies monitoring consumables across your hospital and associated sites. Store personnel can effortlessly record and track the receipt, distribution, and usage of materials, eliminating manual processes and reducing administrative burden.

What benefits will the GV App bring to our service?

The GV App will give you detailed information of where and when products are used around the hospital via the different reports available in the system, allowing you to compare usage. This detailed information tells you how much of each product you are using, which can help you save money by reducing excess stock holding in your stores and excessive or wasteful use across the site.

What kind of products does the app track?

You can record and track any consumable that comes through your stores, including, but not limited to:
· All Domestic Cleaning Products (e.g. bags, chemicals, hand towels)
· Linen Items
· Medical Gases
· Catering Products* (*Please note, the system is designed for ready to serve meals only, not individual ingredients for batch cooking).

Can I add non-GV Health products?

Yes! You can add any consumable product you wish.

What kind of reports can I run?

You can run a range of different tabular and graphical reports, showing both usage in units and cash value, over a selected timeframe, including:
· Issues: These will show you how much of each product has been used & where
· Goods In: This will show you how much of each product you have received.
· Stocktakes: This will show you how much of each product you have in stock.

Can I record products issued from multiple stores?

Yes, you can, you will need to discuss the specific detail of this with the GV App System Manager.

Can I set budgets?

You can set Target figures for product spend in the system, which will compare against recorded product usage. Currently you cannot set a Target for a ward/department.

Will the GV App create my Stock Counts for me automatically?

The system that allows you to create an Assessed Stock Count, this will be based the last recorded stock count, taking into account any goods in and issues recorded since that last recorded stock count. A physically counted and recorded stock need to be done to use the GV App Reconciliation Report.

Will the GV App create Orders for my Suppliers?

The GV App will generate information showing the number of each product used and will give you an idea of what you need to order. It will not automatically generate that order for you on your ordering system as there is no direct link between the 2 systems.

Will the GV App support our sustainability goals?

Yes, you will be able to use the data in the GV App reports to help you look at product usage/ordering to determine where you can make changes to your procedures and product usage to help you in meeting your sustainability goals. To streamline processes, ensure compliance and minimise waste.

What if there is no computer in our storeroom?

If there is no computer in your storeroom on which to run the GV App you can use a tablet, Android or I-Pad, to record product movement, issuing, stocktakes, goods in, etc. This is done via a separate Recording App*, which is downloadable from the relevant Tablet App Store, which is designed for the purpose of just recording the stock movement only. The Recording App is free to download and use of it is included in the annual system charge, you can use the Recording App on multiple tablets at the same time. Once downloaded onto your tablet/tablets it will need to be linked to your GV App system. (*Please note, the reports available in the GV App cannot be viewed via the Recording App).

Can I use a mobile phone to record products on the GV App?

We recommend using a tablet with a minimum of a 9inch screen to view the reports.

Do you need to be connected to the internet to use the GV App?

The GV App System is Cloud based, as such the computer on which you access the system must have an internet connection.
If you are using tablets and the Recording App to record product issues, goods in, stock etc, this can be done without the tablet being connected to the internet. However, to do the initial link of the Recording App to your GV App System, and to 'synchronise' the tablet, (download the recorded data and/or update the products, sites and user setup, the tablet will need to be connected to the internet via Wi-Fi*. (*Please note, a good to strong Wi-Fi connection is required for reliable data transfer).

GV App FAQs cont.

How many users can I have?

There is no limit on the number of users that can be set up.

Can you set different rules for users?

Yes! There are different system access levels you can assign for users depending on their role requirements for using the GV App, User, Supervisor, Manager and Onsite Admin. For more information on access level roles please ask GV App System Manager.

Does GV Health provide set-up support?

Yes, GV Health will set up the system initially for you to make sure that the system operates for you as discussed. Initial staff training will be provided for the purpose of using the GV App, advanced training will be given to required staff with the relevant access levels so that once the system has been set up you will be able to make changes yourselves, e.g. add product, sites, users, record corrections etc.
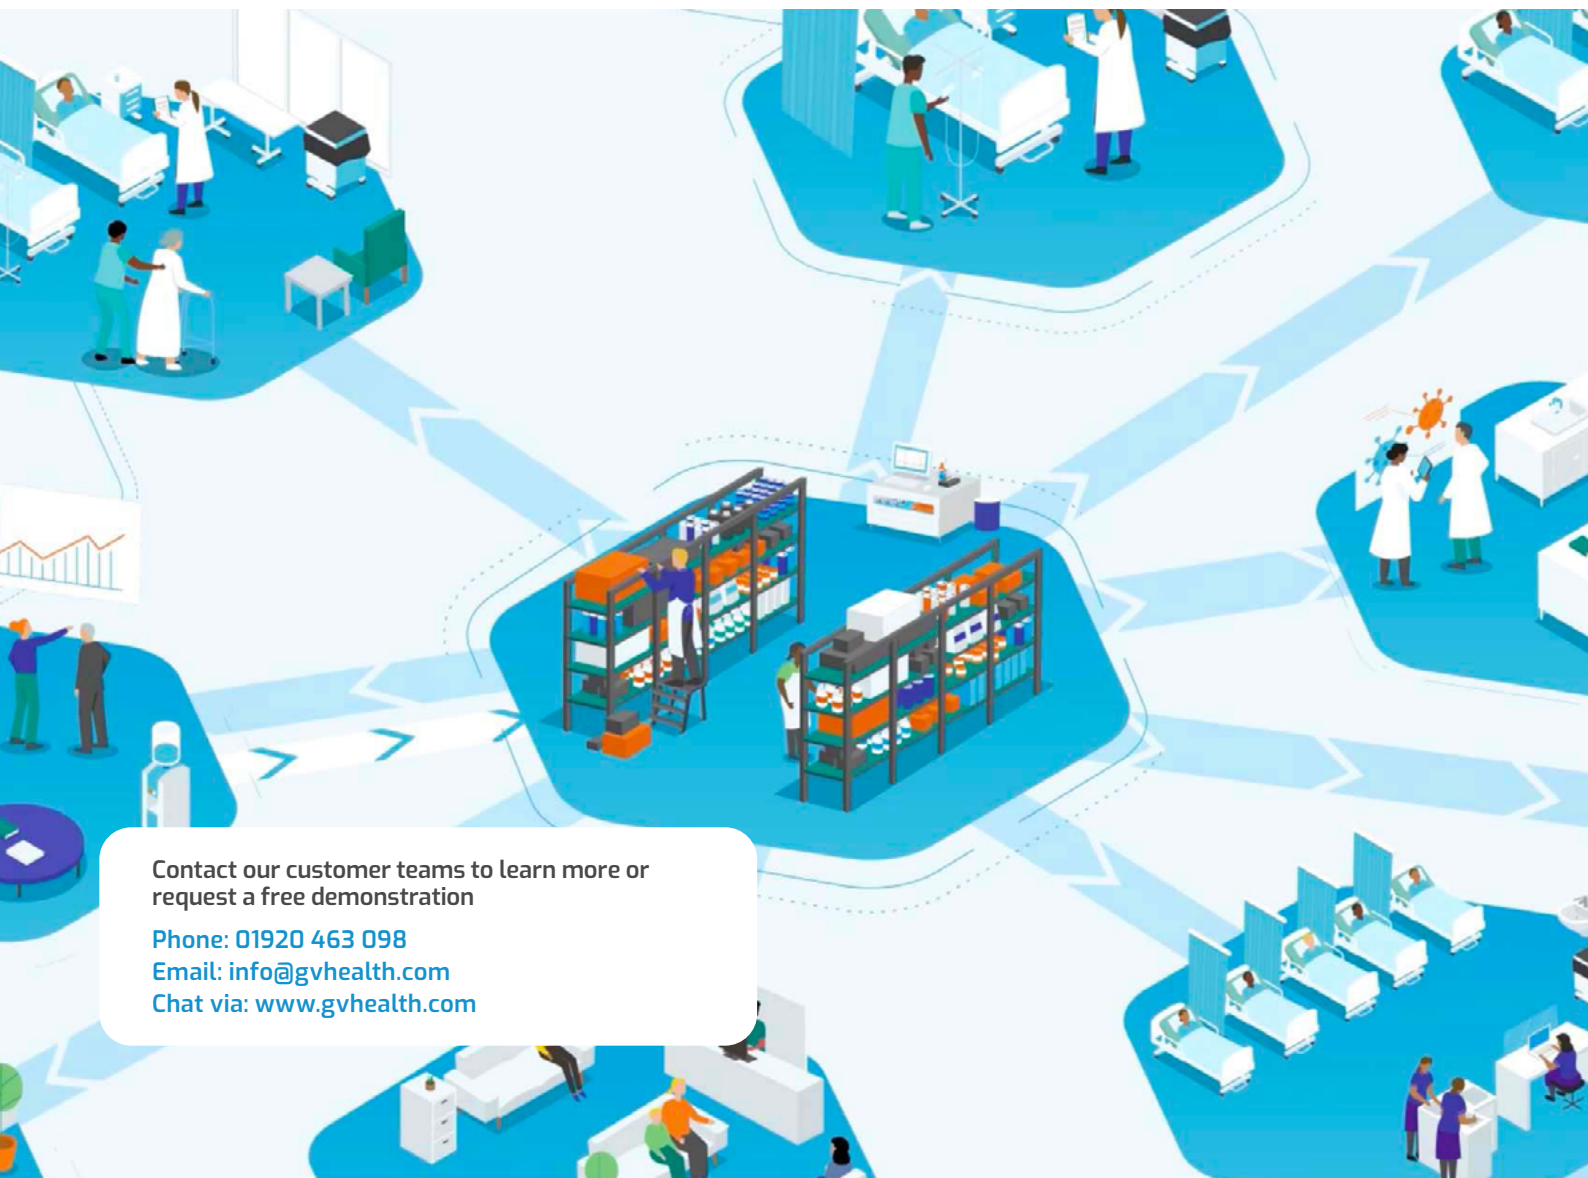

Does GV Health provide the hardware for the GV App (e.g. tablets)?

GV Health do not provide tablets or any other hardware as part of the system.
In certain circumstances we may be able to purchase tablets, which would then be sold on to you, under this arrangement GV Health will bear no responsibility for repair or maintenance of the tablet. We will only provide support for the GV App Recording App you install as part of our system. This should be discussed with the GV App System Manager.

Is this a subscription-based app?

Yes, the GV App is subscription based, paid annually, this includes all licence fees, system setup, unlimited system users, ongoing system and security updates, staff training, ongoing system support by GV Health, downloading of the tablet recording Apps for Android Tablets and iPads, if used. (Refer to page 1 of this document)
