

# Carbon Reduction Plan

Supplier name: GV Health Limited

Publication date: 06/05/2026

## Commitment to achieving Net Zero

GV Health Limited is committed to achieving Net Zero emissions by 2045

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

### Baseline Year: 2024

#### Additional Details relating to the Baseline Emissions calculations.

Our baseline calculation is based on our financial accounting year of March-February. We reset our baseline in 2024 due to a significant improvement in the accuracy of the calculation of our transport and distribution emissions that would make comparison with previous calculations misleading.

Our Baseline calculation includes:

- Scope 2: Indirect Emissions
- Scope 3 Categories: 4: Upstream transportation & distribution: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking: 9: Downstream transportation & distribution:

Our Baseline deviates from the requirements under PPN006 as follows:

- Scope 1: Direct Emissions is not included as we use no fuels in our facilities and have no company vehicles.

### Baseline year emissions:

EMISSIONS	TOTAL (tCO <sub>2</sub> e)		
Scope 1	0 tCO <sub>2</sub> e		
Scope 2	13.6 tCO <sub>2</sub> e	Scope 2 (Market-based)	13.6 tCO <sub>2</sub> e
Scope 3 (included sources as detailed above)	1413.5 tCO <sub>2</sub> e		
Total Emissions	1425.6 tCO <sub>2</sub> e	Total Emissions (Market Based)	1425.6 tCO <sub>2</sub> e

# Carbon Reduction Plan

## Current Emissions Reporting

The significant increase in emissions this year was in transportation due to supplying the English and Welsh NHS with stock to replenish their pandemic supply. This was an additional 77 containers on top of our usual stock requirement.

Reporting Year: Mar 2025 to Feb 2026			
EMISSIONS	TOTAL (tCO <sub>2</sub> e)		
Scope 1	0 tCO <sub>2</sub> e		
Scope 2	9.3 tCO <sub>2</sub> e	Scope 2 (Market-based)	9.3 tCO <sub>2</sub> e
Scope 3 <small>(included sources as detailed above)</small>	2855.7 tCO <sub>2</sub> e		
Total Emissions	2865.1 tCO <sub>2</sub> e	Total Emissions (Market Based)	2865.1 tCO <sub>2</sub> e

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 1086.2 tCO<sub>2</sub>e by 2029. This is a reduction of 23.8 %

Progress against these targets can be seen in the chart below:

Chart shows Location based total

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2024 baseline and the measures will be in effect when performing the contract.

- We implemented heat pumps
- We minimized packaging for several of our bag and apron lines and transitioned from plastic to paper wherever feasible
- Thanks to EV Purchase Scheme, the number of our staff driving electric vehicles increased Business energy consumption to be moved to 100% renewable sources when contract allows
- Moved warehouse and consolidated unit 7 & 8 into unit 3 in the process we switched to a reach truck for internal use to increase pallet capacity, maximising storage solutions. During the refit, we installed LED lighting, which are more efficient, and installed motion sensors so lighting is only on when required.

### Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Investigate and implement recycled plastic tubs for our SoChlor range - subject to testing/approval.
- We will review current container loading to utilise space more effectively, i.e.: not ship fresh air - projects set up to use square tubs rather than round tubs to reduce shipping air.
- We will investigate green shipping lines - working with our shipping partners to understand options open to us.
- For outbound going into London, we are looking at groupage consignments. I.e. one vehicle allocated to do all London bound drops, to reduce the number of vehicles carrying maybe just one or two pallets in the capital.

# Carbon Reduction Plan

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN006 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
